

The new brace-less design allows for far greater clearance when working over parapet walls

Davit Pro's spigot system ensures full compatibility with all of our existing bases while being both stronger and lighter than our previous spigot

Safety Engineering Products

New 2018 Davit Pro

The advanced new extruded aluminum profile construction allows us to obtain outreach lengths up-to 2m from the center of the socket and up-to 2m of vertical clearance for single user and two-man rescue operations, independently tested to BS:8610-2017

The Davit Pro can also be configured as a split arm featuring two sections up-to 900mm each to allow for ease of transport and installation as well as on-site configuration, the split arms can offer outreach options up-to 1.5m for single user and two-man rescue operations to BS:8610-2017
